## [My Portfolio](#)

## About Me

I am a recently graduated high school student at Summit Academy, receiving my Graphic Arts and TV Broadcasting cords for being a completer in CTE and my familiarity with Adobe products. Also recently graduated Mountainland Technical College with a certificate/degree in Digital Marketing & Analytics. Me and some friends bought a school bus a year ago and are working on renovating it into a RV(skoolie). We'd be the FIRST EVER high schoolers to do so and the project is going incredibly well. I've done all the logo, graphics, and brand design for our company [busmabois](#).

## Experience

### **Toro Ramen and Sushi | Cook, Dishwasher, and Server | August 2022 - November 2023**

I'm showcasing this position because it was my first work experience and lasted quite a bit. I learned how to do a lot there, but the most important one is communication. I learned how to communicate with coworkers that knew English fluently and coworkers that didn't speak a lick of English in a fast paced cooking environment we needed to be precise, and quick and we were.

### **Mountainland Technical College | Associates Degree in Digital Marketing and Analytics**

At Mountainland Technical College I took the Digital Marketing and Analytics program. I learned SEO, Social Media Marketing, Email Marketing, Web Design, and Digital Design. I also learned how to put together Marketing and Social Media strategies and do Website and Social Media audits. Here I learned alot but I want to specify the extra experience I gained with Adobe Suite products such as Photoshop, Illustrator, InDesign, and Premiere. I also learned how to use Canva and other Digital Design products/services.

### **Summit Academy | High School Degree | TV Broadcasting and Graphic Design Completer CTE**

At Summit Academy High School I spent 4 years taking Graphic Design, Video Production, and TV Broadcasting. Here I gathered my passion for Digital Design and learned the most about Photoshop, Illustrator, InDesign, Premiere, and After Effects. I took these classes for 4 years and had the same two phenomenal teachers, Brandon Fonda and David Pyle.
